ANNOUNCEMENT

MINOR in COMPUTER SCIENCE

The minor in Computer Science is designed to prepare students in other majors for careers in a wide variety of fields which require computer science expertise. Department of Electrical Engineering and Computer Science in the Catholic University of America is pleased to offer a ‘minor in computer science’. The minor in computer science allows you to enhance a career in engineering, business, art, music, mathematics or any other sciences.

Requirements for a minor in computer science:

The student must complete six three-credit hour courses in Computer Science. At least two courses should be selected from 300 level or above.

Choose four CSC courses or more from the suggested seven courses:

- C/C++ Programming  CSC 123  (required)
- Object-Oriented Programming with Java  CSC 223  (required)
- Data Structures  CSC 280  (required)
- Theory of Computing  CSC 212
- Software Development  CSC 363
- Concepts of Programming Language  CSC 370
- Analysis of Algorithms  CSC 411

Choose two CSC courses at the 300 level or above.

The student may choose Computer Science courses outside of the suggested electives prior written permission from their computer science advisor. For more information, please contact the EECS Chair, Dr. Phillip A. Regalia, regalia@cua.edu, 202-319-5193.
