

## **BWAC CUA Site Posters**

**(Please contact Hang Liu at [liuh@cua.edu](mailto:liuh@cua.edu) for more information)**

Cloud-Based Attack Detection and Mitigation System

Enhanced Source Location Privacy Based on Random Perturbations for Wireless Sensor Networks

Exploiting MIMO Antennas in Cooperative Cognitive Radio Networks

A Hybrid Information Centric Network Architecture

Optimizing Quality of Experience in Real-Time Communications

Automated Rice Cooking Robot

Compressive Sensing Based Approaches for Electromagnetic Applications

Hardware Accelerated Numerical Method for Large-Scale EM Problems

Human Vital Sign Detection in Clutter

Establishing RF Measurement Facility at CUA

Experimental Framework for f-EEG Data Collection and Analysis for Cognitive Assessment and Biometric Applications
